

Volunteer Home Energy Advisors Needed!

This winter Groundwork Northamptonshire is running a project to improve the energy efficiency of homes in your area, and to advise people on how to save money on heating & energy consumption. Groundwork is looking for volunteers to support the project in the following ways:

- Attending the half day of training delivered by Groundwork Northamptonshire
- Topping up their knowledge where necessary, using the information materials provided
- Practice doing home energy visits on the homes of other volunteers
- Working with other local volunteers to find households to receive home energy visits
- Perhaps in pairs, carrying out home energy visits to local households. We hope for 20 visits in total.
- Promoting the project locally
- Helping to organise two home energy events in the local area
- Keep in touch with the project officer at Groundwork, and return information on home visits to him/her.

Groundwork Project Officers will support you and provide information and materials to undertake the visits.

If you would like to volunteer, please contact Alison Phillips on 01536 526 453, 07912 274 633 or email Alison.Phillips@groundwork.org.uk
